After reading what you did NOT do to Microsoft on the Ap. I must complain that you have sold out the computer users of the world to a Monopoly. MS has a strangle hold on the computer users and no small company will ever shake them loose. There is NO competition and never will be unless you break them up. Had the Government NOT broken up AT&T we would still be renting our 6lb bell ringing phone from the local phone company and paying \$0.50 per minuet for long distance. We need competition in the computer industry not a giant killer.
